

NAVEEN K

DATA ANALYST | POWER BI DEVELOPER

naveenkumar19sai@gmail.com | +91-6382445356 | Chennai, Tamilnadu | [linkedin.com/in/naveenk](https://www.linkedin.com/in/naveenk) | github.com/naveenk

PROFESSIONAL SUMMARY

Data Analyst with 6 months of hands-on internship experience in SQL, Power BI, Power BI Service, Python, and Excel, specializing in data analysis, business intelligence, and dashboard development. Built 5+ end-to-end interactive Power BI dashboards and developed 60+ DAX measures across multiple business domains, transforming structured and unstructured data into actionable insights. Experienced in data cleaning, Power Query, data modeling, Exploratory Data Analysis (EDA), SQL querying, KPI reporting, and publishing reports through Power BI Service. Passionate about solving business problems through data-driven decision-making and seeking an entry-level Data Analyst role.

TECHNICAL SKILLS

- **Data Analysis** - Data Cleaning, Data Transformation, Trend Analysis, Root Cause Analysis, Statistical Analysis, Exploratory Data Analysis (EDA)
- **Power BI** - Power BI Desktop, Power BI Service, Power Automate, Power Apps, Power Query, Data Modeling, Star Schema, Dashboard Development, KPI Reporting, Workspace Management, Report Publishing, Data Visualization
- **MySQL** - SQL Joins, Subqueries, Aggregations, Window Functions, CASE Statements, Database Design, Query Optimization
- **Python** - Pandas, NumPy, Data Wrangling, Data Visualization, Jupyter Notebook
- **Microsoft Excel** - Pivot Tables, VLOOKUP, XLOOKUP, Charts, Power Query, MS Office Suite, VS Code, Git & GitHub

INTERNSHIP EXPERIENCE

Data Analyst Intern | Besant Technologies | Jan 2026 – Jun 2026

Technologies: SQL, Power BI, Power BI Service, Power Query, Python, Excel, Data Analysis

- Collected, cleaned, and transformed structured and unstructured datasets using SQL, Power Query, Excel, and Python, preparing analysis-ready data for reporting and business insights.
- Performed Exploratory Data Analysis (EDA) to identify trends, anomalies, and patterns that supported data-driven decision-making.
- Developed 5+ end-to-end interactive Power BI dashboards featuring KPI cards, drill-through reports, bookmarks, dynamic slicers, and cross-page navigation.
- Created 60+ DAX measures across multiple dashboards, including KPI calculations, time intelligence, ranking, variance analysis, and performance metrics.
- Designed star-schema data models and optimized table relationships to improve report performance and analytical accuracy.
- Wrote advanced SQL queries using JOINS, CTEs, Window Functions, Aggregate Functions, CASE statements, and Subqueries for data extraction, transformation, and analysis.
- Published dashboards to Power BI Service, managed workspaces, and shared reports through secure links for stakeholder access and collaboration.
- Delivered end-to-end analytics solutions covering data preparation, modeling, visualization, and dashboard deployment to support business reporting.

PROJECTS

[Last Mile Delivery Cost Surge Analyzer](#) | [GitHub](#)

Technologies: MySQL, SQL, Relational Database Design, Data Analysis, Business Intelligence, KPI Reporting

- Designed and developed a normalized relational database with 6 interconnected tables to analyze the impact of fuel price fluctuations on last-mile delivery operations — a real-world supply chain analytics use case.
- Implemented Primary Keys, Foreign Keys, Constraints, ENUMs, and Indexes to enforce data integrity and optimize query performance.
- Performed quantitative analysis on fuel price trends, delivery costs, rider earnings, order volumes, and platform profitability across multiple cities.
- Developed complex SQL queries using JOINS, Aggregate Functions, Subqueries, CASE Statements, and KPI calculations to generate actionable business insights.
- Built business intelligence reports to identify high-cost delivery zones, fuel surcharge impact, rider profitability, and platform margin risks — enabling data-driven operational decisions.

[Sales Performance & Business Insights Report](#)

Technologies: Power BI, DAX, Power Query, Data Modeling, KPI Reporting, Dashboard Development, Business Intelligence

- Developed an interactive, multi-page Sales Analysis Dashboard in Power BI to monitor end-to-end business performance across sales revenue, profit margins, regional trends, and product category performance.

- Designed 5 analytical report pages: Dashboard Overview, Sales Overview, Time-Based Analysis, Sales Distribution, and Regional Analysis — covering the full analytical lifecycle.
- Created dynamic KPIs, interactive charts, slicers, and drill-through reports to enable self-service analytics and data-driven decision-making for business stakeholders.
- Performed data cleaning and data transformation using Power Query and implemented advanced DAX measures for calculated columns, measures, and time intelligence functions.
- Analyzed sales trends, regional performance, and category-wise distribution to identify growth opportunities and revenue optimization strategies.

Healthcare Insurance Claims & Fraud Analytics Dashboard

Technologies: Power BI | DAX | Power Query | Data Modeling

- Developed an end-to-end interactive Power BI dashboard analyzing 20,100+ healthcare insurance claims to monitor claim performance, patient demographics, provider efficiency, and fraud trends.
- Designed a multi-page reporting solution comprising Executive Overview, Claims Analysis, Patient Insights, Provider Performance, and Fraud Analytics dashboards.
- Created 20+ DAX measures and KPI indicators including Total Claims, Claim Amount, Average Claim Value, Fraud Rate, Length of Stay, and Provider Performance metrics.
- Built a star-schema data model and performed data transformation using Power Query to ensure accurate reporting and efficient data analysis.
- Implemented interactive features such as drill-through reports, dynamic slicers, bookmarks, and cross-page navigation to enhance user experience and analytical exploration.
- Analyzed diagnosis codes, provider specialties, admission types, and geographic claim distribution to identify claim patterns and potential fraud indicators.

COURSES& CERTIFICATIONS

[Microsoft Power BI Data Analyst - Microsoft](#)

[Google Data Analytics Professional Certificate – Google](#)

[Generative AI for Data Analysts – IBM](#)

Data Analytics Course Completion Certificate – Besant Technologies | 2026

EDUCATION

Bachelor of Engineering – Electronics & Communication Engineering (ECE) | Graduated: May 2025

J. J. College of Engineering and Technology | CGPA: 7.4

Higher Secondary Certificate (HSC) | 2020 – 2021

Vidhya Matric Higher Secondary School | Percentage: 78%
