NAVEEN K

DATA ANALYST • DATA ENGINEER

naveenkumar19sai@gmail.com | +91-6382445356 | Chennai, Tamil Nadu
linkedin | GITHub | Portfolio

PROFESSIONAL SUMMARY

- Data Analyst with 6 months of internship experience in data analytics and Business Intelligence. Proficient in SQL, Power BI, Python, DAX, Power Query, Excel, and Microsoft Azure, with hands-on experience in data cleaning, transformation, ETL workflows, data integration, exploratory analysis, and Star Schema data modeling.
- Skilled in developing KPI-driven Power BI dashboards, writing optimized SQL queries, performing data validation, and preparing reliable datasets for reporting and analysis. Familiar with data pipeline concepts, structured data processing, and cloud-based data workflows.
- Experienced with project-based analytics use cases across Banking, Finance, Healthcare, Retail, Manufacturing, and Industrial IoT, translating business requirements into actionable insights and supporting data-driven decision-making.

TECHNICAL SKILLS

- **Business Intelligence:** Power BI Desktop, Power BI Service, DAX, Power Query, Dashboard Development, KPI Reporting, Row-Level Security (RLS), Drill-Down Reports, Power BI Gateway, Scheduled Refresh
- **Databases:** SQL, MySQL, Azure SQL Database, Joins, CTEs, Window Functions
- **Programming:** Python (Pandas, NumPy, Matplotlib)
- **Data Engineering:** ETL, EDA, Data Modeling, Star Schema, Data Cleaning, Data Transformation, Data Validation
- **Visualization:** Power BI, Looker Studio
- **Cloud:** Microsoft Azure, Azure Data Factory, Azure Databricks, Azure Blob Storage
- **Tools:** Advanced Excel, Git, GitHub, Power Automate, VS Code, MySQL Workbench
- **Core Competencies:** Data Analytics, Business Intelligence, Business Reporting, KPI Reporting, Dashboard Development, SQL Development, ETL Pipelines, Data Visualization, Business Insights, Query Optimization, Performance Analysis

WORK EXPERIENCE

BDREAMZ GLOBAL SOLUTIONS - CHENNAI *Data Analyst | Feb 2026 – Aug 2026*

- Analyzed and transformed business datasets using SQL, Excel, Python, and Power Query, performing data cleaning, validation, and quality checks to prepare reliable data for reporting.
- Developed interactive Power BI dashboards with KPI cards, slicers, drill-throughs, bookmarks, and business-focused visualizations for performance monitoring and analysis.
- Designed Star Schema data models by creating relationships between fact and dimension tables and applying appropriate data modeling practices for efficient reporting.
- Created DAX measures, calculated columns, and KPIs to calculate business metrics, track trends, and support data-driven decision-making.
- Wrote SQL queries using joins, subqueries, CTEs, aggregations, and window functions to extract, analyze, and validate data from relational databases.
- Worked with business requirements to identify reporting needs, perform ETL and data transformation, and deliver actionable insights through Power BI reports and analytical solutions. business objectives.

PROJECTS

Last Mile Delivery Cost Surge Analyzer | GitHub

Tools & Technologies: MySQL | SQL | Power BI | Excel | Python

Project Description:

Developed a real-world logistics analytics project to analyze last-mile delivery costs, fuel price fluctuations, rider earnings, order volume, and platform profitability across multiple cities. Designed a relational database, cleaned and validated data, and used SQL to identify cost drivers and high-risk delivery zones. Built Power BI dashboards to track operational and financial KPIs.

Key Achievements:

- Designed and implemented a 6-table relational database using Primary Keys, Foreign Keys, constraints, and indexes.
- Cleaned and validated 12 months of delivery data, handling duplicate, NULL, and inconsistent records.
- Developed 25+ SQL business queries using JOINs, CTEs, subqueries, CASE statements, and window functions.

- Identified high-cost zones, fuel cost impact, rider payout trends, surge patterns, and margin risks.
- Built interactive Power BI dashboards with KPIs for delivery cost, order volume, fuel impact, rider earnings, and profitability. Generated actionable insights to support delivery pricing and operational cost decisions.

Healthcare Insurance Claims & Fraud Analytics Dashboard | Power BI

Tools & Technologies: Power BI | DAX | Power Query | Data Modeling | Excel

Project Description:

Developed an interactive 5-page Power BI dashboard to analyze healthcare insurance claims, reimbursement trends, provider performance, and fraudulent claim patterns across hospitals, states, and patient demographics. Built KPI measures and drill-down visuals to monitor claim volume, cost drivers, and fraud risk.

Key Achievements:

- Analyzed 20K claims worth 25B+ across 1K hospitals from 2020 to 2025, tracking total claim amount, average claim, and genuine vs. non-genuine claims.
- Identified fraud hotspots, finding that Specialist Offices account for about 50% of fraudulent claims and that state-level fraud rates range from 22.5% to 27.5%.
- Analyzed late-submitted claims by service and admission type to flag fraud-prone submission patterns.
- Built claims, patient, and provider analysis by diagnosis code, age group, gender, admission type, and specialty, showing Cardiology and Orthopedics as the highest-cost specialties.
- Designed an interactive 5-page report with slicers, map visuals, drill-down, and page navigation to support claims management and fraud-investigation decisions.

CERTIFICATIONS

- Microsoft Power BI Data Analyst — Microsoft
- Google Data Analytics Professional Certificate — Google
- Generative AI for Data Analysts — IBM

EDUCATION

Bachelor of Engineering, Electronics & Communication Engineering

J. J. College of Engineering and Technology | CGPA: 7.58 | Graduated: May 2025
